## 1.Temesgen Hordofa Waktura

Name: Temesgen Hordofa Waktura

Country: Ethiopia

School: Forestry

Major: Master of Forestry

Tutor: Liz Xiaodong

Education Level: Master

Work Alter Graduation: Research

### Feelings About Graduation:

First of all, I would like to express my deep appreciation for giving me health and support me on all the daily work that I have been done in this university for the last three years. I

would like to express my deepest gratitude to the Chinese Government for its financial support that made my dream to study in China true. The role of Beijing Forestry University for its advanced education with comfortable and modern accommodation facilities they are giving for international students is so great, really, I'm happy to join such friendly environment with full of such humble staff to help us in our difficulties and I'm feeling proud to be taught by such well known and disciplined professors. Even though I couldn't return to China due to the COVID-19 I am successfully finished my study online.

When I came here everything including environment and weather condition, food, etc. were new to me. However, I adapted everything within a short time due to unlimited supports from international student office and Chinese friends. Professor Liu Xiaodong and his Chinese students also acknowledged from my deep heart for their support on my research work that has a great contribution in my happiness of this day. This graduation day will be the memorable day in my life. Because it is the beginning of the second stage of my life. Therefore, I am very happy with this interesting day and also this day make me unhappy in another way since I'm going to miss my friends those came from different countries and stayed with me for the past years here in Beijing Forestry university.

It's not feeling good to be apart from many Chinese and International friends that We shared our culture, language, happiness, sorrow and various situation together for the last three years. Even if we're going to live in different parts of the world, our true friendship will last forever, this makes a day of graduation as a day of both happiness and sadness in my life. It's known that graduation is a unique experience that feel you excited, sad, and everything in between. Moreover, graduation is the day at which all students harvest their fruits that was grown for years by professors and teachers. These fruits can play major role in changing the life of individuals and societies. Generally, I would like to thanks again all concerned bodies that helped me in many directions and make this great time for me.

## 2.ABDUL MAJID (马伊德)

Name: ABDUL MAJID (马伊德)

Country: Pakistan

Major: Soil and Water Conservation

School: Soil and Water Conservation

Tutor: Dr. Zhongbao Xin

Educational Level: Master

Work after graduation: I will continue my studies after graduation. I have applied for Ph.D. at Beijing Forestry University, China.

### Feelings About Graduation:

I'm super excited as I have successfully defended my master dissertation and submitted my final thesis. I want to pay my deepest gratitude to my supervisor Prof. Xin Zhongbao and his family, whose help and attention I have completed my research work. He always guided me every step of the way whenever I needed anything or any kind of help. He always supported me and gave instructions briefly to me. After that, I want to thank all the people and all my fellow students who have always considered me their own and come to my help whenever I need it whether it's my research work or any other university work. During all these three years of my master's degree in university, I met a lot of good people and good teachers. All this time is very precious and memorable for me. I learned a lot in these three years. I hope all these things will work for me in the future. In these three years, I have made many new friends with whom every moment spent is very memorable. I also want to thank the staff members of the International Student Office (ISO) for your kind interest and support over the past three years. In the end, I want to say thanks to all of my dear friends in (China) as well as in (Pakistan) for your interest and understanding, for helping me in every step of my life to enjoy my life-besides-work, and for your patience, especially in the last year of this Master's-journey. I am very grateful to the International Student Sports Organization with whom I have participated in extracurricular activities. Stay blessed all of us always.

### 3.Gunjan Gahatraj

Name: Gunjian Gahatraj

Major: Forest Economics and Management

Education Level: Master

Tutor: Xue Yongji

#### Feelings About Graduation :

My name is Gunjan Gahatraj. I am from Gandaki Province Nepal. I have been studying Master Degree in Forest Economics and Management at Beijing Forestry University since 2019. The program is going to graduate this year. It is such pleasure to share in the intensity of emotions in this graduation ceremony provided by International College. My labor and effort are almost to be paid off for bringing these achievements. Beijing Forestry University (BFU) is an instrument for all these successes.

I have been working as an officer at Department of Forest, Nepal. For the betterment of my personal aptitude, knowledge, skills and capacity I was looking for an opportunity and finally the choice became BFU. This choice indeed brought me to where I am today. I have found the places to continue my dreams to be enticed with our professor's professionalism, equivocal passion for knowledge and incomparable humility and wisdom. It helps me a lot in my personal and professional career.

In life, I wanted things always to be easier for me but it is not always possible in the quest for knowledge and wisdom. Life at Beijing is not easy, finances, time, intellect and emotion have to be managed well. I would like to thank CSC for managing my financial allowance make life easier in Beijing. BFU has taught me patience, perseverance, independence and commitment. I found myself at another level of maturity that I had not felt before.

Last but not least, I would like to thank my supervisor (Dr. Yongji XUE), ISO, School of Economics and Management, my family and all of my friends who have been helping and making me at this position.

### Feelings about graduation:

I am happy to complete a master's successfully in China. Thank for giving me the knowledge, strength, and patience.

Special thanks to all the supervisors for their academic contributions and support; Assistant Professor Shi Hongliang, who taught me how to think and verify the accuracy of the information from whatever source; otherwise, I will not be able to finish this task. I would also like to thank the china government, Beijing Forestry University, the Faculty of forestry for support and guidance, which made me complete my studies. I owe my deepest gratitude to my parents who took care of my professional life since my childhood and guided me all the time until they realized my academic success by providing all the necessary support. I thank my wife and

friends for their es support, love, interest, guidance, and material and moral support provided to me. I will never forget my family group at Beijing Forestry University and people I would like to express my sincere appreciation to all the staff at the International Student Office . Education Level: Master

Work after graduation: Perusing Ph.D. from BJFU

E-Mail Adress: hussainsajid@bjfu.edu.cn

Phone Number: +92-3125852141

### Feelings about Graduation

First of all, I express my deepest gratitude to Almighty Allah, the most merciful and beneficent, who enabled me to complete this task, which marks an important turning point in my life. Foremost, I would like to express my sincere gratitude to my supervisor Dr. Prof. Yang Hua for the continuous support of my Master's Study and research, for her encouraging behavior, patience, motivation, enthusiasm, immense knowledge, generous assistance, and enlightened supervision in the accomplishment of my degree. China always had something that amazed me in some ways like incredible history, culture, prominent civilization, and fascinating lifestyle. I watched lots of documentaries and read books on Chinese history to get felt like amazing and thought something special. I was wise early on because I had to see such a country with my own eyes. During undergraduate studies in Pakistan, the number of international students shared beautiful scenery and life in China on social media which encouraged me to come over to China for higher studies. I found myself very enthusiastic in proceeding with my higher studies in China, and explore life and culture as well. At the end of my undergraduate degree, I applied for a prestigious fully-funded Chinese Government Scholarship (CSC) to pursue my post-graduate degree in Beijing Forestry University (BJFU). This was a great and proud moment for me to be awarded a full scholarship from CSC in BJFU, the best university in the field of forestry across China. I traveled to China by road so that I can observe Chinese culture closely. I started my journey from Gilgit Baltistan (GB), the northern area of Pakistan, through Khunjab Pass. I tasted a variety of foods, observed the hospitality and welcoming behavior of Chinese peoples. It was an unforgettable journey of my life. On the first day of my arrival in Beijing, I found an excellent way of transportation inside the city such as public transport and especially the subway. observed a huge difference in living style, language, culture, etc. At the start, I found myself a little nervous due to the language barrier, but I made a commitment myself to learn the Chinese language, and finally, I made progress in the Chinese language. Now I can communicate with the public, which has also broadened my way of understanding Chinese culture. I was so excited because my new chapter of life had just started towards more challenges in my upcoming days. Chinese people are very friendly, polite, hardworking, progressive, and no offense is expected in China. I was embraced warmly and now I fall in love with China. Besides my studies and research, I mostly make plans with friends and alone to visit different places to

## ///BEIJING FORESTRY UNIVERSITY GRADUATION ALBUM///

explore the history, culture, civilization, ways of living, dressing, variety of foods, and customs to strengthen my knowledge and broaden my exposure. During my stay in China (BJFU), I have visited many beautiful cities of China such as Shanghai, Hangzhou, Nanjing, Xiamen, Jinan, Tianjin, Kashghar, Urumqi, Xian, Dalian, Shandong, and Tashkurgan. During my traveling, I have observed a great infrastructure developed by the Chinese government. These all experiences of my traveling has increased my self-confidence and encouraged me to have faced more challenge to become strong enough to cope with difficulties and I will love to share my traveling experiences with the international community. To draw the attention of people from all over the world, the rich culture, peace-loving people, and naturally blessed lands like China, I write articles about my traveling and experiences in China.

China and Pakistan are good friends since the liberation of China and will be at all times. These services are a testimony to the real and close association between the two nations. China has progressed exponentially, due to excellent management of government,

Finally, my heartfelt gratitude goes to my family, especially my father and brother who provided never-ending encouragement for my academic endeavors over the entire academic life. And I am also greatly thankful to the Chinese Scholarship Council (CSC), Beijing Forestry University, and International Student Office for providing this golden opportunity to complete my higher degree and fulfill my dreams.

## 18.Seidu Musah (木萨)

Name: Seidu Musah (木萨)

Country: Ghana

Major: Forestry Economics and Management

School: Economics and Management

Supervisor: Professor LI Lingchao

Qualification: Master

### Feeling About Graduation :

Based on my experience, the learning method in BFU combined individual and group projects, lectures, peer learning, professional placement, seminars, tutorials as well as workshops that instilled in me more beyond measure. Through this inculcation, I got developed on my creative, analytical, practical and presentational skills which enabled me to consolidate materials learnt earlier in the program (Forestry Economics and Management), extend my skills, and research new areas through an outlet by applying theoretical knowledge in a practical setting. With this remark I will be grateful for the opportunity forever. When I return back to my country, upon graduation, I hope to use the knowledge and skills acquired in BFU to make significant contribution and greater impact to the forestry industries in Ghana, Africa and the world as a whole. I also hope to champion a sensitization programs that will engage forestry industries to provide fast and reliable services to deserving Ghanaians and in the same vain, enforce

stringent punitive measure on non-performing ones. Being a research assistant at Ghana Cocoa Board, specifically the research department, I understand a lot of effort must be applied for a good student to turn into a good teacher since a similar gap lies between a good student and a good researcher. This in one way or the other engulf my aspirational instinct ablaze until this far of my academia pursuant. Long live my

alma mater (Beijing Forestry University), long live China!!!

Feeling about graduation

First of all, I would like to thanks to BFU, staffs, ISO, and especially APFNet for funding support in my study. Moreover, I would like to pay my respect to my respectful supervisor, professor Chen Xiaoqian. She is always being a reliable person to give me good advises, especially whenever I run into troubling situations or questions. A lot of time, advices, documents, courage, motivation, and inspirations are provided to me during the hard time and I will always be grateful for these. Honestly, I feel sad to leave BFU because I made amazing friends while I' m here, but I am also happy because graduation means I am making progress in our life. Things have finally come full circle and moving on can sometimes feel bittersweet.Finally, I would like to wholeheartedly thanks to my family for the unceasing love, encouragement, support, attention, and sacrifice for my study.

### Feelings About Graduation

First of all, I express my deepest gratitude for enabling me to complete this work, which marks an important turning point in my life. Foremost, I would like to express my sincere gratitude to my supervisor's Prof. Gao Guanglei and Prof. Zhao Yuanyuan for the continuous support of my Masters Study and research, for his encouraging behavior, patience, motivation, enthusiasm, immense knowledge, generous assistance and enlightened supervision in the accomplishment of this manuscript. I am greatly thankful to the Beijing Government Scholarship (Forbidden City), International Student College and Beijing Forestry University for providing this golden opportunity to complete my higher degree and fulfill my dreams. On analyzing my performance during the study duration in (BFU), I believe that I was quite successful to a significant extent. In this regard, it is worth mentioning the fact that I have completed all the courses with more than 90% Marks including Basic Chinese courses. On the other hand, I believe research skills became particularly important for me during the semester because, while writing my papers, I conducted some research first. I have also completed Three Research Papers during the master degree and almost all of them were quite successful in a high index journal. At the same time, BFU provided me many opportunities and I participated in different International training workshops, symposium and represent myself as a speaker 1st time in front of international scientist that was a life changing moment for me. During my academic accomplishment and research work I also participated all the activities organized by the (ISA, BJFU) because, it is necessary to relax and fit mentally and physically. Specially, I would like to thank my Supervisors (Gao Guanglei and Zhao Yuanyuan), and School of Soil and Water Conservation, Beijing Forestry University, specially International Student College for giving me the opportunity to get internship at MCFLY Technology Co., Ltd. At first, when I began looking for an internship, I was not sure that I liked having so much freedom in my decision, but looking back. I am truly grateful for

this opportunity. I am appreciative of the way the Beijing Forestry University, School of Soil and Water Conservation they provides the internship opportunity because it caused me to seek out my own internship and set-up all the details involved. The International Student College was helpful when I had questions, but it was good for me to oversee every aspect of my internship and, in the end, has been advantageous. I believe this approach would be beneficial to encourage students to find their internship based on their future career goals. My experience at BFU has been outstanding. I feel proud and it's been a great honor for me to be a part of this prestigious institute and successfully completed my master graduation. I know that not every student is fortunate enough to obtain an admission that will provide him or her with as much hands-on experience as mine has, but I wish that every student could. Everything I was taught in my Master classes was put into practice while at the University from courses such as (introductory, compulsory, elective) to upper level classes like Writing in Research Articles.

Finally, my heartfelt gratitude goes to my family, my grandparents especially my parents who provided never-ending encouragement for my academic endeavors over the entire academic life. I would like to thank my Uncles for their moral support. I would like to thank my brothers, sisters, cousins and friends for their sincere support and love.

At the end, I dedicate my dissertation to my beloved deceased younger brother Abu Zar, who passed away last April 2021 just couple of months before the completion of degree. I wish he could have been here with me, and I hope I have made you proud.

### Feelings about Graduation

Graduation is one of the most important milestones in my life. It has given me the opportunity for grooming myself academically, personally and morally. I am thankful to all those great individuals who have helped me, each in their own way, over the past three years of my graduation. Firstly, I would like to thank my parents and brothers for their unconditional support; encouraging me to continue doing what I love doing. Celebrations are more joyous when shared with them, and troubles seem to dissipate by their kindness and love. I would like to thank my supervisor: Prof. Dr. Shouhong Zhang. It is because of his continued kind support, guidance and supervision at every stage that I have been able to grow personally and academically particularly in

scientific research over the past three years of graduation. His kindness and care were the crutches I needed during times of need. I must acknowledge Prof. Zhang for his patience and dedication to empowering me to continue challenging myself and deepen my technical critical understanding. Finally, I would also like to thank the Administrative Staff of School of Soil and Water Conservation and the whole staff of the International Students Office (ISO), their immense support from the first days to graduation helped to solve any problem and alleviated any stresses. I also would like to acknowledge the Chinese Government Scholarship (CSC) for financial support to pursue M.Sc. Forestry (Professional Degree) at Beijing Forestry University. Honestly, neither I am glad nor unhappy

because it is really hard for me to say goodbye to Beijing Forestry University.
